

Cleaning Up Matkon

Cleanup of Matkon

A time consuming task that frequently was not worth the effort. How do you identify outdated items, unused departments?

Once you have found them, how tedious is it to delete them?

We have developed a series of reports, data extracts and procedures that make it possible to clean up Matkon in a reasonable time frame and at a reasonable cost. Each site is unique, but each site also builds on a significant amount of common experience.

We will work with you to define the parameters of the clean up - Items that were not ordered in 3 years, or locations that have not used the item, or whatever parameters you specify.

The parameters will be up to you. - The implementation will be done for you.

Contact us at (859) 341 5219 or via e-mail info@exclusivesoftware.com for details.

If you are leaving Matkon soon, why convert outdated data. If we clean it first, the conversion and implementation will likely go better and smoother.
