

Training Overview

Day 1 - Basic

For new users of Data Writer, this class introduces the basic concepts of Data Writer, and moves through the creation of simple custom reports.

Day 2 - Advanced Data Writer

This class builds on the Day 1 concepts, and is a good starting point for moderately experienced users of Data Writer, who wish to create more advanced reports.

Day 3 - New features in Data Writer

This class covers the use of new features added to Data Writer. Generating Bar Codes, controlling printer formats, creating scripts, Exporting data to Excel, and integrating data with other applications are among the topics covered.
